

Submission Checklist — Week 5 Landing Page

Clark Jendrix Cabillon · Client-Server Technologies · Repository: <https://github.com/clrkcbn/week05-landing-page>

Status: All 12 items complete. Landing page, documentation, and screenshots are in the public repository (22 commits); the LinkedIn post is published and the repository link is submitted through the LMS.

DONE	ITEM	EVIDENCE
✓	Responsive landing page completed	<code>resources/views/pages/home.blade.php</code> assembles the full page; mobile-first Tailwind breakpoints (<code>sm:</code> <code>md:</code> <code>lg:</code>) throughout.
✓	All required sections implemented	Navbar, Hero, Features (6-card grid), Product Showcase, Pricing (3 plans + monthly/annual switch), Testimonials, Contact form with inline validation, Closing CTA, Footer.
✓	Blade Components created and reused	12 components in <code>resources/views/components/</code> — button, icon, navbar, hero, section-heading, feature-card, showcase, pricing-card, testimonial-card, contact, cta, footer. Card components rendered in <code>@foreach</code> loops.
✓	Tailwind CSS used throughout the project	Tailwind CSS v4 via Vite; <code>resources/css/app.css</code> imports Tailwind plus design tokens (one accent colour, type scale, spacing rhythm, radius system). Every component styled with utility classes.
✓	Desktop, tablet, and mobile layouts tested	Tested at 390 / 820 / 1280 / 1440px. Captures in <code>screenshots/</code> : <code>desktop-view.png</code> , <code>laptop-view.png</code> , <code>tablet-view.png</code> , <code>mobile-view.png</code> .
✓	Public GitHub repository	https://github.com/clrkcbn/week05-landing-page — visibility set to Public.
✓	Minimum of 10 meaningful Git commits	22 commits with conventional messages (chore: scaffold Laravel 13 project; feat: build responsive navbar; feat: implement membership pricing cards; docs: rewrite README; and more).
✓	Complete README.md documentation	14 sections: project title, introduction, objectives, responsive web design, Tailwind CSS, Blade components, UI design, folder structure, screenshots, before/after, problems & solutions, reflection, getting started, credits.
✓	Before-and-after comparison included	README section 10; <code>documentation/before-unstyled.jpg</code> + <code>after-styled.jpg</code> ; <code>screenshots/before-design.jpg</code> + <code>after-design.png</code> .
✓	Screenshots folder completed	20 images in <code>screenshots/</code> : responsive views, every section, before/after, VS Code project structure, Blade components folder, GitHub repository page.
✓	LinkedIn post published	Post published on LinkedIn with before/after screenshots attached; final text saved in <code>documentation/linkedin-post.md</code> .

DONE	ITEM	EVIDENCE
	Repository link submitted through the LMS	Repository URL submitted via the LMS submission form.
